## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 2-12 and 14-24 are allowed.
2. The following is an examiner's statement of reasons for allowance: the method for producing an expanded, farinaceous food product having enhanced characteristics without the use of a drying oven of independent claims 14-15 define over the prior art of record because the prior art does not teach, suggest, nor render obvious plasticizing a farinaceous food mixture into a first extrudate flow in an extruder barrel having a barrel pressure equal to or in excess of the vapor pressure of the water in the mixture, directing the first extrudate flow from said extruder barrel to a central passageway, dividing the first extrudate flow into a plurality of adjacent extrudate flows, injecting a continuous band of flavored fluid additive between said adjacent extrudate flows utilizing a co-injection die insert having at least one capillary channel, wherein said fluid additive is supplied to each capillary channel via a separate channel port in fluid communication with a peripheral reservoir manifold circumscribing said central passageway, coalescing the plurality of adjacent extrudate flows into a second extrudate flow while generally maintaining the fluid additive band's relative position between the plurality of adjacent extrudate flows, and extruding the second extrudate flow through a nozzle section into a zone of ambient pressure below the vapor pressure of the water in the mixture.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
